HK WORKLOAD PLANNER

User Guide — Version 2.0

1. HOTEL CAPACITY

- Click the ⓘ icon in the upper-right corner.
 - Edit the **Total Capacity (Rooms)** according to your hotel's room capacity.
-

2. PLANNER NAME

- Enter your name in the **Planner Name** field.
 - The previously submitted plan will be displayed as **Last Archived**, together with the name of the previous planner.
-

3. HOTEL FORECAST

Enter the following information:

- **Room Sold** — today's room sold figure.
- **Arrival** — tomorrow's expected arrival rooms.
- **Departure** — tomorrow's expected departure rooms.
- **Turn Down** — tomorrow's expected turn-down rooms.
- **Dropped Room** — today's dropped / unfinished rooms.
- **Pick Up / Moved Room** — current pick-up or moved rooms.

Note: Turn Down is recorded for data collection purposes only and is **not included in Room Attendant Distribution**.

4. ROLE CREDITS

Adjust the **Credit Allocation** for each role when necessary.

Advanced Settings

General Settings

- **RA Names**

Replace generic RA names such as **RA1, RA2, etc.** with dedicated Room Attendant names. Example **Andi**

- **RA + DW**

Example: **Andi + DW** will automatically be counted as **RA + DW Credit**.

- **RA + Trainee**

Example: **Andi + Trainee** will automatically be counted as **RA + Trainee Credit**.

- **DW**

Example: **DW Andi** or **DW** will automatically be counted as **DW Credit**.

- **Trainee**

Example: **Trainee Andi** or **Trainee** will automatically be counted as **Trainee Credit**.

Stayover Allocation

The **Stayover Allocation** setting prioritizes the allocation of Stayover rooms. If available manpower is insufficient, some vacant rooms may be carried over to the following day.

- **Max Stayover Room**

Sets the maximum number of Stayover rooms allocated to each RA. The value is calculated by dividing the total Stayover rooms by the number of Required RAs.

- **Max Stayover — RA + DW**

Sets the possible number of Stayover rooms that can be completed by an **RA + DW** combination.

- **Max Stayover — RA + Trainee**

Sets the possible number of Stayover rooms that can be completed by an **RA + Trainee** combination.

5. DAILY INFORMATION

Enter any necessary daily information that you want to appear on the **printed document**.

6. WORKLOAD SUMMARY

- Set the **Weight** for each room category according to your operational requirements.
 - The system will calculate the **Total Cleaning Credit** based on the assigned weights.
-

7. ROOM ATTENDANT DISTRIBUTION

The system will display the room distribution for: Room Attendant (RA), DW, Trainee, RA + DW, RA + Trainee.

8. PRINT DISTRIBUTION

Click **Print Distribution** to print the **Room Attendant Distribution**.

9. ARCHIVE

Submit the completed planning data to the designated **Google Sheet or Excel file**.
